

GREEN GREEN ENERGY GREENEST

Digging beneath the surface of *Green*. . . and why it matters to the **construction industry**

A FREE MONTHLY LECTURE SERIES offers an innovative opportunity for construction professionals and the general public to learn the facts and take the myth and guesswork out of building green.

Building Codes

People-ability, Planet-ability, Profit-ability and the new bottom line.

**February 23rd
Tuesday @ 7pm**

**Bellevue College
NWCET Building, Room N201**
(free parking & refreshments served)

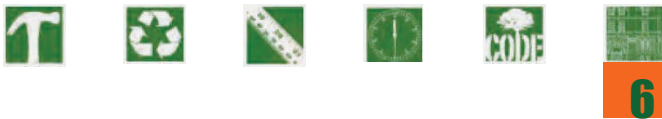

Visit <https://bellevuecollege.edu/about/around/directions/>

What does development driven by the **triple bottom line** (a balance between economic growth, quality of life, and environmental sustainability) look like?

What misinformation or assumptions may limit our understanding of what can be achieved by adopting this new perspective?

What policies, initiatives and programs would motivate and reward meaningful change that in turn would promote innovation and economic opportunity?

Attend this informative discussion with professionals who understand change is inevitable and taking advantage of opportunities brought about by change is just plain smart, especially if you are leading the pack.

Panelists

Tim Nogler, Managing Director, WA State Building Code Council, serves as liaison on building code issues between the Council and the state Legislature, the Governor's office, other state agencies and the public. He makes every effort to help people understand the purpose of the building codes. Tim is a WA State delegate to the National Conference of States on Building Codes and Standards.

Kim Drury, Senior Policy Associate and Special Programs Manager, NW Energy Coalition, has experience in energy efficiency policy and implementation that includes developing and managing energy conservation programs for Seattle City Light, the WA State Energy Office, and managing Seattle's water conservation program. She served as the project manager for former Mayor Greg Nickels' climate protection initiative.

Vicki Colgan, Regional Coordinator, Sustainable Building, WA Dept of Ecology, is the senior member of the Green Building Group. She is a Sustainable Building Advisor, a LEED® Accredited Professional, and an NCI Charrette Manager. Vicki's background is varied; management, organizational development, and training with field experience in geology, hydrology, and water law.

Martha Rose, President, Martha Rose Construction, The energy crisis of the 70's sparked Martha's interest in conservation and alternative energy that became intertwined with her career in construction. As an educator and life-long learner, Martha promotes the deep understanding this topic requires and pushes the building industry towards zero-energy-use homes. Her project, Fish Singer Place, is slated for completion in spring, 2010.

Moderator Adrian Willanger, Founder of Eco-Redux
