Flow sensor ⁴	Up to \$130	<ul style="list-style-type: none"> Flow sensors measure how slowly or quickly water is flowing through an irrigation system and sends that information to an irrigation controller Required to be connected to a WaterSense irrigation controller
Master valve ⁴	Up to \$130	<ul style="list-style-type: none"> Installed at the base of the backflow device, which controls water flow into the mainline of the system
Pressure reducing valve (PRV) at point of connection ⁴	Up to \$260	<ul style="list-style-type: none"> Large brass valve installed by a professional technician to reduce water pressure to an entire irrigation system; drip system pressure reducing valves do not qualify for this rebate Requires pre-approval by utility staff to ensure equipment was properly installed

Commercial water customers of Fort Collins Utilities are eligible for some irrigation rebates that are administered via Fort Collins Utilities directly. Please click [here](#) for more details.

Additional requirements (continued on next page)

-
- Rebates are available for NEW equipment only. Used or refurbished equipment does not qualify.

Estes Park | Fort Collins | Longmont | Loveland

- Applications must be submitted within 45 days of purchase or installation/delivery. Proof of installation or delivery will be required. Self-certification is not eligible.
- Proof of purchase required. Proof of purchase, or other supporting documentation, must include: date of purchase, price paid, model information to verify eligibility and shipping information if applicable.
- Rebates are limited to 100% of the final retail price paid for the rebated equipment. Rebates are subject to available funds.
- Limits apply – either through eligible application cap or by availability of rebate funds. Some measures have a minimum quantity requirement.
- Fort Collins Loveland Water District, Spring Canyon Water District, ELCO and West Fort Collins Water District customers do not qualify for Efficiency Works rebates. Rebates are funded through the eligible utilities listed.
- Utility reserves the right to verify installation of a rebated product.
- Efficiency Works reserves the right to discontinue or change rebates without official notice.
- Recycling of old toilet is highly recommended. New construction does not qualify.
- Commercial customers only – total incentive amounts over \$10,000 requires pre-approval and need to be processed through the Efficiency Works Business rebate program. Learn more and apply at <https://efficiencyworks.org/business/rebates/>
- Multifamily properties with five (5) or more units per building and a commercial water meter qualify for commercial rebates. Multifamily properties with fewer than five (5) units per building, or individual tenants, with a residential water meter qualify for residential rebates.
- Rebates not available for showerheads that are directly installed or provided as part of other Efficiency Works programming.
- MaP Premium eligibility will be confirmed using the [MaP website](#). This is done by entering in the model number of the toilet purchased. Model information will be taken from the receipt, other provided documentation, or from a retailer website where the purchase was made. If the search does not result in a toilet being MaP Premium listed, the toilet will not be deemed eligible for the MaP Premium rebate. See example on the following page.
