Efficiency Works™

Estes Park | Fort Collins | Longmont | Loveland

Revised November 2026

Flex EV incentives and conditions

	Efficiency Works Flex EV	Fort Collins Peak Partners
Program type(s)	• Eligible EV • Eligible Level 2 charger	• Eligible Level 2 charger
Eligible electric utilities	• Estes Park Power and Communications • Longmont Power & Communications • City of Loveland Utilities	• Fort Collins Utilities
Eligible customer type(s)	• Residential • Small commercial	• Residential • Small commercial
Incentive(s)	• $50 one-time new enrollment • $60 per year for active participation	• Learn more at the Peak Partners website.
Overview of offering	• Participants earn incentives by allowing their EV to charge at optimal times. • After enrolling, participants will set their charging preferences and keep their EV plugged in when at home or at their business. The program automatically schedules charging during low-cost and high renewable periods – while still ensuring the EV is ready when needed. • Participants can override adjustments at any time. • Flex EV does not draw charge from a participant's EV battery.	• Learn more at the Peak Partners website.
Eligible devices	• View the list of eligible EV and Level 2 chargers here. • Only one type of eligible device (EV or Level 2 charger) may be enrolled per address, up to two. • Must be internet-connected.	• Learn more at the Peak Partners website.
Learn more	• Visit the Flex offering guide.	• Learn more at the Peak Partners website.
Sign up	• Search for your device and enroll here.	• Enroll through the Peak Partners website or call 855-350-1464.

Efficiency Works™

Estes Park | Fort Collins | Longmont | Loveland

Revised November 2026

Incentive details and requirements

- For full details on how the voluntary Efficiency Works Flex EV program works, see the Offering Guide here.
- Incentives are available to residential and commercial electric customers of Estes Park Power and Communications, Longmont Power & Communications and City of Loveland Utilities.
- Fort Collins Utilities electric customers are not eligible to participate in the Efficiency Works Flex EV program because Fort Collins offers its own Smart Charging programs. Learn more at the Peak Partners website. Learn more at the Peak Partners website.
- Participants may enroll with either an eligible EV(s) or Level 2 charger.
    - Participants cannot enroll in both device technology types at the same address.
- Eligible EV and EV Level 2 charger models are listed here.
    - This list may change without notice.
- The enrolled address must have WiFi, and the EV or EV Level 2 charger must remain connected and registered with the device provider (i.e., ChargePoint, Tesla, etc.).
    - Some devices may not have their own managed charging app and may utilize EnergyHub's web/mobile app.
- Participant must own or lease the equipment and be authorized to make decisions for the enrolled address.
    - Residential and commercial tenants renting a site may be eligible to participate if the enrolled EV or EV Level 2 charger is registered in the renter's name, using their rental address and email address.
- Efficiency Works reserves the right to verify installation of an incentivized device.
- Efficiency Works reserves the right to change incentives or discontinue the program at any time.
- In addition to meeting the criteria above, the following factors will also be considered before Participant enrollment is approved:
    - Multiple EVs or EV Level 2 chargers may be eligible per address if they control unique equipment, but only one device type may be enrolled. Additional verification may be required before enrollment approval.
    - If an existing participating EV or EV Level 2 charger device is replaced with a new eligible device, the new device may need to be re-enrolled. An additional enrollment incentive will not be issued, but you remain eligible for the annual incentive for continued participation.

  - Participant's EV or EV Level 2 charger device must be tied to an individual electric meter. Multiple residential or commercial tenants using a shared electric master meter may not be eligible.

- Annual incentive requirements (paid in the 4th quarter):
  - Enroll before August 31 (for first-year eligibility)
  - Keep the device enrolled and registered at the approved address.
  - Keep the device connected to the internet when at its primary dwell/home location to receive a signal for participation.
  - If a device is disconnected for an extended period of time, an email reminder to reconnect may be sent.
  - Maintain at least 25% participation in charging adjustment events per year.
  - If a participant does not meet this threshold, the program reserves the right to limit the annual participation incentive.
  - Remain in good standing with program requirements.
- Efficiency Works reserves the right to unenroll participants that do not meet minimum connectivity and participation requirements.
