

More ways to save on HVAC maintenance

Simplify HVAC maintenance with the **Efficiency Works Performance Plus program**

HVAC systems are one of the largest energy consumers in the average commercial building. Scheduling regular maintenance checks can improve the reliability and performance of equipment while reducing energy use and operating costs. Frequent preventative maintenance through the Efficiency Works Performance Plus program can help maximize the benefits and optimize your HVAC system.

Performance Plus program

The **Efficiency Works Performance Plus program** is designed to take a deeper look at HVAC equipment, specifically rooftop units.

Businesses that are eligible:

- Are located in Estes Park, Fort Collins, Longmont or Loveland
- Have one or more rooftop units for cooling
- Do not have a full building automation system

How the Performance Plus program can help your business

Services you will receive:

- Inspection and optimization of economizers (if applicable)
- Inspection and optimization of supply- and return-fan motors
- Two condenser-coil cleanings per year
- Refrigerant-level inspection and repair
- Optimization of the thermostat and schedule

Benefits you can enjoy:

- Lower operational costs
- Improved equipment performance and reliability
- Lengthened equipment life
- Increased indoor air quality
- High-quality maintenance at an affordable price
- Seamless process with contractors you know and trust
