

Your custom roadmap to an electric fleet

Efficiency Works Business offers versatile support and solutions for commercial fleet electrification. Our goal is to provide high-quality customizable information for customers exploring the transition to electric vehicles focusing on financial and environmental impacts which will help customers make informed and actionable decisions about the future of their fleets.

Commercial electric customers of Estes Park Power and Communications, Fort Collins Utilities, Longmont Power & Communications or Loveland Water and Power can access technical resources, advising and incentives from Efficiency Works.

Resources

Utilize the free EV Fleet Planner tool to preview the cost of ownership, emissions impacts and much more. Explore the Fleet Electrification webpage to learn about additional funding opportunities and local requirements.

Service providers

Find contractors specializing in Fleet Electrification Studies and EV Charging Infrastructure that are well-versed in our programs using our service provider page.

Incentives

Offset the cost of a more in-depth fleet electrification study through incentives. Get preapproval by working with a listed Efficiency Works service provider.

About Efficiency Works

Efficiency Works is a regional utility collaboration that provides guidance and resources to enable customers to use energy effectively, work toward a noncarbon energy future and build strong, resilient communities for customers served by Platte River Power Authority and its owner communities of Estes Park, Fort Collins, Longmont and Loveland.

Fleet Electrification Study Incentives

Need a more in-depth analysis of your fleet before you electrify? Our Fleet Electrification Study incentive uses a network of listed Efficiency Works service providers to conduct electrification assessments for eligible customer fleets. Efficiency Works Business offers an incentive intended to offset some or all of the study's cost based on customer fleet vehicle makeup. Find full eligibility and incentive details in the program guide at efficiencyworks.org/business/fleet-electrification

Step 1

Complete a high-level assessment with the free EV Fleet Planner tool and determine a need for a more in-depth study.

Step 2

Contract with a listed service provider to submit a preapproval application and complete the study.

Step 3

Your study results are delivered, final application is submitted and the rebate is processed for payment.

Customers must meet the following minimum eligibility requirements:

- The dwell location of the fleet vehicles is a commercial electric customer of Estes Park Power and Communications, Fort Collins Utilities, Longmont Power & Communications or Loveland Water and Power.
- Participants have the legal right and authority to install electric equipment at the vehicle dwell locations.
- Participants lease or own equipment or vehicles that dwell within the respective municipal utility service area.
- It is expected that customers first perform a simple fleet electrification self-assessment for their site using Efficiency Works' free EV Fleet Planner tool provided online before pursuing an in-depth study utilizing Fleet Electrification Study incentives.

Study incentive details and additional requirements:

- Efficiency Works offers three tiers of incentives based on vehicle duty type and quantities entered on the incentive pre-approval application covering up to 100% of the study cost.
- Customers are required to utilize a listed Fleet Electrification Study service provider from the Efficiency Works Find a Service Provider page.
- Service Providers must complete an online pre-approval application on behalf of the customer and receive pre-approval confirmation from Efficiency Works Business before conducting the assessment.

Vehicle classification*	Tier 1	Tier 2	Tier 3
Light-duty vehicles (LDVs) or non-road equipment**	Up to 25 LDVs	26-100 LDVs	101+ LDVs
Medium and heavy-duty vehicles (MHDVs)	Up to 5 MHDVs	6-12 MHDVs	13+ MHDVs
Incentive per assessment	\$15,000	\$20,000	\$30,000

*Light Duty Vehicles are defined as any vehicles weighing under 10,000 lbs. Medium Duty Vehicles are defined as vehicles that weigh 10,001 – 19,500 lbs. Heavy Duty Vehicles are defined as vehicles that weigh from 19,501 – 26,000 lbs. **Non-road equipment encompasses golf carts, ATVs, floor sweepers, forklifts, mowers, backhoes, and others.
