

Insulation and air sealing

Air Sealing

Efficiency measure	Gas-heated home rebates	Electric-heated home rebates	Measure guidelines*
Tier 1 >25%	\$220	\$330	<ul style="list-style-type: none"> Tiers are measured air reduction percentage Minimum leakage reduction of 10% must be verified by final blower door test Combustion safety test required
Tier 2 >33%	\$330	\$440	
Tier 3 >50%	\$440	\$550	

Insulation

Efficiency measure	Gas-heated home rebates	Electric-heated home rebates	Measure guidelines*
Conditioned crawl space	Up to \$880	Up to \$1,320	<ul style="list-style-type: none"> Rebates are calculated based on square footage up to maximum limit for each area being insulated Rebate amounts are also dependent on the type of insulation used and existing conditions of the home Combustion Safety Test required
Cold crawl space	Up to \$275	Up to \$412	
Basement wall	Up to \$1,155	Up to \$1,815	
Cantilever wall	Up to \$220	Up to \$330	
Floor over garage	Up to \$220	Up to \$330	
Wall	Up to \$550	Up to \$825	
Attic	Up to \$550	Up to \$825	
Cathedral ceiling	Up to \$550	Up to \$825
