

Business pumps and fans

While Efficiency Works Business does not offer rebates for new pumps or fans for upgrades or first-time purchases for new construction, we encourage customers to purchase high efficiency units to save energy and money over the course of the equipment's lifetime. We also partner with local distributors to help make sure that high efficiency pumps and fans are ready when they are needed. Just ask your contractor to give you a quote for a high efficiency unit.

Efficiency Works does offer rebates for retrofitting existing pumps and fans with a variable-frequency drive (VFD) to increase efficiency. To learn more, visit EfficiencyWorks.org/business/rebates.

See the tables below to clarify what qualifies as high efficiency.

High efficiency pumps and fans				
Equipment	Subcategory	Size category	Minimum PEI or FEI to qualify	Standard
Pumps	Constant speed	≥1 and <200HP	<0.96	Tested in accordance with 10 CFR Appendix A to Subpart Y of Part 431
	Variable speed	≥1 and <200HP	<0.49	
Fan and blower	Ducted	≥1 and <75HP	≥1.25	Tested in accordance with AMCA 208-18
Power roof ventilator	Unducted	≥1 and <20HP	≥1.25
