

Add value to your business **and save money!**

The Efficiency Works Business program is designed to help your business efficiently use energy and water. Upgrading to energy efficient equipment can reduce operational costs and enhance the safety, comfort and appearance of your business.

Three simple steps to saving

Step

1

Step 1: Free energy advising and assessments

An energy advisor can conduct a free, no-obligation assessment of your business' energy and water systems and will provide a report of recommended efficiency upgrades, including available incentives. If you already have a project in mind, an energy advisor can help maximize your energy savings and facilitate the incentive process for free, just contact us.

Step

2

Step 2: Free direct installation

If your business qualifies, you can obtain free energy and water saving products at the time of your energy assessment.

Step

3

Step 3: Rebates for efficiency projects

You may be eligible for rebates by completing energy efficient equipment upgrades¹. Your energy advisor will submit the paperwork necessary to receive the rebate.

Why should I participate?

Higher building value

New products and upgrades enhance the appearance and value of your business.

Lower bills

Efficiency upgrades will lower utility bills and minimize both energy and water consumption.

Less maintenance

New, longer lasting products mean less time replacing worn or broken items throughout your business.

Happier employees

Increase employee productivity and improve comfort.

Do I qualify?

To participate, your building(s) must be an electric customer of Estes Park Power & Communications, Fort Collins Utilities, Longmont Power & Communications or Loveland Water and Power. In addition, the property must have at least one commercial meter.

¹ Consult your energy advisor to ensure that your equipment qualifies. Our energy advisors will assist with identifying rebate opportunities and will also provide support every step of the way, from working with contractors to submitting rebate paperwork.

Direct install **measures**

Direct install measures allow an Efficiency Works certified energy advisor to provide optimal energy and water savings at no cost to you. These measures can reduce energy and water usage and provide instant utility cost savings.

Our team may install the following qualifying products* at your business:

High efficiency LED lighting

Advanced power strips

Energy efficient showerheads

Pre-rinse sprayers

Smart thermostat

Snack vending miser

Energy efficient faucet aerator

Beverage vending miser

LED downlight retrofit kit 13W

Condenser coil cleaning service

LED specialty lamp MR16 7W

Refrigeration gaskets / strip curtains

Efficiency Works commercial rebates

You may qualify for rebates listed below.* Contact the Efficiency Works program to receive your free assessment and identify your opportunities.

Lighting replacement

Upgrade Type	Rebate (per watt reduced)
LED fixture (fluorescent replacement)	\$1.00
LED fixture (HID/incandescent replacement)	\$1.00
LED retrofit (fluorescent replacement)	\$0.50
LED retrofit (HID/incandescent replacement)	\$0.50
LED lamp, bulb, or other	\$0.10
ENERGY STAR® prescriptive fixtures	Varies (see application)
Controls (multi-level)	\$0.25 bonus
Controls (DLC networked controls)	\$0.50 bonus

New refrigeration equipment

Upgrade Type	Requirements	Rebate
Ice machine	ENERGY STAR	\$200-\$300 per unit
Hot food holding cabinet (≥7 ft³)	ENERGY STAR	\$600 per unit
Reach-in fridge or freezer (<19 ft³)	ENERGY STAR	\$250 per unit
Reach-in fridge or freezer (19-30 ft³)	ENERGY STAR	\$500 per unit
Reach-in fridge or freezer (31-60 ft³)	ENERGY STAR	\$750 per unit
Reach-in fridge or freezer (61-90 ft³)	ENERGY STAR	\$1,000 per unit
Ultra-low temperature freezer (T< - 94°F)	ENERGY STAR, MDEC < 0.42 kWh/day/ft³	\$450

Kitchen equipment

Upgrade Type	Requirements	Rebate
Electric steamer*	ENERGY STAR	\$1,200 per unit
Electric fryer	ENERGY STAR	\$200 per unit
Electric griddle	ENERGY STAR	\$600 per unit
Combination oven - electric	ENERGY STAR	\$1,200 per unit
Convection oven - electric	ENERGY STAR	\$400 per unit
Demand control kitchen ventilation (vent hood exhaust)	MAU, also controlled	\$400 per hp
	MAU, not controlled	\$200 per hp
Commercial dishwasher (w/ electric water heater)	ENERGY STAR	\$300-\$2,000
Commercial dishwasher (w/ gas water heater)	ENERGY STAR	\$250-\$2,000

Refrigeration equipment upgrades

Upgrade Type	Requirements	Rebate
Zero energy glass door		\$125 per door
Low energy glass door		\$75 per door
Anti-sweat heater (ASH) controls		\$100 per door
Electrically commutated (EC) evaporator fan motor	reach-in cooler/freezer	\$50 per motor
	walk-in cooler/freezer	\$100 per motor
Permanent magnet synchronous evaporator fan motor, e.q. Q-Sync7	reach-in cooler/freezer	\$100 per motor
	walk-in cooler/freezer	\$250 per motor
EC compressor head cooling fan motor		\$50 per motor
Night covers (vertical or horizontal)		\$20 per in ft case
Smart defrost control for walk-in freezer		\$400 per controller
Evaporator fan controls for walk-in cooler or freezer		\$50 per fan motor
Outside air economizers for walk-in cooler or freezer		\$1,250 per unit

Efficiency Works commercial rebates

You may qualify for rebates listed below.* Contact the Efficiency Works program to receive your free assessment and identify your opportunities.

Office & appliance

Upgrade type	Requirements	Rebate
Clothes washer* (residential or commercial, including vended)	ENERGY STAR	\$25-\$275
Dishwasher* (residential style)	ENERGY STAR	\$25
Refrigerator (residential style)	ENERGY STAR	\$50
Ultra-low temperature freezer (T < -94°F)	ENERGY STAR, MDEC < 0.42 kWh/day/ft ³	\$450
Tank toilet	WaterSense	\$50-\$75
Flushvalve toilet	WaterSense	\$80-\$100
Urinal	WaterSense	\$80-\$100

Public electric vehicle (EV) charging infrastructure

Equipment type	Criteria	Incentive
Level 2 public electric vehicle charging infrastructure incentive - non-networked	Accessible for public use, ENERGY STAR certified	\$1,000 per charging port
Level 2 public electric vehicle charger infrastructure incentive - networked capable	Accessible for public use, ENERGY STAR certified, Wi-Fi enabled	\$5,000 per charging port

Variable frequency drives (VFDs)

Motor capacity (hp)		Rebate (\$/hp)
Min	Max	
1	75	\$300 fans
1	75	\$300 pumps
1	75	\$150 compressors
75+	-	Custom

Fans, pumps and compressors are eligible.
 Custom rebates may be available for VFDs above 75 hp.
